# RESPIRATORY & INDUSTRIAL SAFETY GARMENTS

The ELSA is available in durations of 10 or 15 minutes in high visibility PVC or black anti-static polyurethane materials. The ELSA apparatus consists of a cylinder with combined cylinder valve and reducer, supply hose to constant flow hood and stowage bag. The ELSA is activated upon opening the bag whereby a pin which is attached to the ELSA hood is released

Dangri is primarily used in industrial settings where workers are exposed to a variety of hazards such as chemicals, flames, and sharp objects. The garment is designed to protect the worker's clothing and skin from damage or injury, and it can be worn over regular clothing.(Customisable as per user requirement)

Optional integrated wireless 25 field-interchangeable sensor options, including PID, NDIR, and exotics like ammonia, chlorine, and formaldehyde

Five local and remote alarms, including man down  
Dust-tight and waterproof (IP65-rated)

Rugged design

Onboard gas libraries include 190 VOCs and 55 combustible gases

Longest battery run-time in its class Intuitive, icon-driven interface

Flippable screen Large buttons for easy navigation even with up to three glove layers Feedback

Continuous data logging — six months for five sensors 24/7

**CUSTOMIZATION AVAILABLE AS PER USER REQUIREMENT**
